Office Action Summary	Application No. 10/811,565	Applicant(s) MARQUEZ, SALVADOR	
	Examiner Christopher D. Prone	Art Unit 3738	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103 as being unpatentable over USPN 6,736,845 B2 Marquez et al in view of WO 00/53356 Habersack et al.

Marquez discloses the invention substantially as claimed being heart valve implant comprising a support frame for a flexible leaflet prosthetic heart valve made of nitinol comprising a plurality of cusps 74, a plurality of enlarged ear shaped commissures 80 further comprising a fragile bridge 90, and a fabric covering. However, Marquez does not disclose that the frame and bridges be a continuous homogeneous material.

Habersack discloses a continuous homogeneous metal sheet make with dedicated thinner weak portions as break points in the same field of endeavor for the purpose of ease of production.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the teaching of a continuous homogeneous breakable connections as taught by Habersack with the implant of Marquez in order to simplify production and reduce costs.

Response to Arguments

Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

However, in response to the applicant's arguments it is old and well known to produce thinner breakable hinge joints or frangible joints between to connecting metal pieces, additional examples are:

USPN 3,439,917

USPN 658,598

USPN 2,247,499

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
